

Gentlemen, I respectfully urge you to reject NAB petition 04-160. Government has no business meddling in our capitalistic economic system which encourages competition. This is clearly a case of simple competition. I support XM and the satellite radio business as a legal alternative to traditional radio. Traditional radio programming offers little variety. Way too much air time is spent on mindless commercials which repeat a phone number up to five times in a 30 second time slot and are repeated ad nauseum hour after hour. I gladly pay the monthly fee to hear a clear static free broadcast with no commercials. Thank you for your time. Ke Broda
